

Anti-BlackCore Additive

PHYSICAL AND CHEMICAL PROPERTIES

Chemical Nature:	Inorganic oxides with water
Aspect:	Brown liquid
pH:	7-9
Solubility:	In water: complete

PRODUCT DESCRIPTION AND USE

It is a product designed to make easy the organic matter combustion, making fast decomposition.

It is normally uses in ceramic slips with high % of organic matter.

The addition will be the % needed to solve the black core problem needed so it is advisable to carry out several tests to find the optimum %.

Normally, we can find the range of uses between 0,2-0,5%.

PRESENTATION AND INDICATIONS

Closed drums of 125 Kg. and tanks of 1000Kg
