

# CERAMIC BACK ENGOBE

## CERAMIC BACK ENGOBE

### PHYSICAL AND CHEMICAL PROPERTIES

Chemical Nature:

Inorganic solid or liquid

Aspect:

White powder or liquid

Solubility:

Complete with water

### PRODUCT DESCRIPTION AND USE

Our back engobe is a mixture of raw materials designed to be applied by roller on the back of the tiles that creates a protection between tile and roller inside the kiln, in order to extend the shelf life of these.

It has the necessary fusibility to keep a clean atmosphere inside the kiln but maintaining the optimum refractoriness to ensure its proper performance.

This product is specially formulated to avoid problems of chemical attack when tiles are packed.

### PRESENTATION AND INDICATIONS

Closed drums of 125 Kg. and IBCs of 1000Kg

Bags of 25 Kg and Big-bags of 1000-1200Kg
