

# Non Slip Soft

## PHYSICAL AND CHEMICAL PROPERTIES

Chemical Nature:	Watery suspension of inorganic oxides.
Aspect:	Milky white liquid.
Density:	1,023 ± 0,01 g/cc
Solubility:	In water: complete

## PRODUCT DESCRIPTION AND USE

NonSLIP SOFT is a product that applied over a green body tile or a glazed one gives, after the firing stage, a significant rising of its surface's anti-slip nature.

The product is delivered ready for its usage by airbrushing.

The quantities of liquid to apply depend on the kind of glaze and firing cycle, but, with a general character it can be established a range between 50 and 100 g/m<sup>2</sup>.

To determine the optimum weight is advisable to make various trials.

We can apply the product directly over the glazed tile or mixed in the top glaze.

Make a non slip surface is easy. Make a non slip surface and soft is possible with NonSlip Soft

## PRESENTATION AND INDICATIONS

Closed drums of 125 Kg. and tanks of 1000Kg
