

SekCID[®]

NON STICK SOLUTION FOR WALL TILES

PHYSICAL AND CHEMICAL PROPERTIES

Chemical Nature:	Dissolvent solution of modified elements of fluorosiloxane.
Aspect:	Opalescent liquid
Density :	0,977 g/cc
Solubility:	In water: Complete
Comentarios:	FLAMMABLE

PRODUCT DESCRIPTION AND USE

SEKCID[®] has been specially developed for give non stick property to the surface of the ceramic tiles. The formulation of this product let us maintain the features of the surface pending more time, protect it of the dirty and helping the cleaning. SEKCID act decreasing the superficial energy to 18 mN/m, inhibiting the stick of water and vapors. The product is applied with a weight of 10-15 gr/m² on the fired and dry tile, with the help of a sponges put in a rotating discs. Once applied do not need more treatment. Is recommended do not moisten the surface of the tile pending at least 1 hour.

PRESENTATION AND INDICATIONS

Closed drums of 125 Kg. and tanks of 1000Kg

FLAMMABLE
