

Self-Cleaning Solution

PHYSICAL AND CHEMICAL PROPERTIES

| | |
|------------------|---|
| Chemical Nature: | Organometallic compound dispersion of Ti Cation |
| Aspect: | Yellowish Liquid |
| Ph: | 6-7 |

PRODUCT DESCRIPTION AND USE

EVZ-00121L is a solution that give photo-catalytic effect to wall tile surfaces after a thermal treatment. This treatment is normally between 400 y 600 °C, 5-10 min depending of the procedure. This solution is applied by airless, with weights of 5-10 gr/m². In function of the applications conditions could appear iridescent effects dues to differences of weights. The coat obtained does not disappear with water effect.

EVZ-00121L works under UV radiation in the next way:

- Dissolving organic material
- Degrading bacteria
- Decomposing smelly gases (NH₃, H₂S,..)

PRESENTATION AND INDICATIONS

Closed drums of 125 Kg. and tanks of 1000Kg
